

Recognizer.h

```
graph BT; maincpp[main.cpp] --> recognizerh[Recognizer.h]; recognizercpp[Recognizer.cpp] --> recognizerh;
```

The diagram illustrates the relationships between three C++ source files. At the top is a gray box labeled 'Recognizer.h'. Below it are two white boxes: 'main.cpp' on the left and 'Recognizer.cpp' on the right. Two blue arrows point from the bottom of these boxes up to the bottom of the 'Recognizer.h' box, indicating that both 'main.cpp' and 'Recognizer.cpp' include 'Recognizer.h'.

main.cpp

Recognizer.cpp
