

`Segmenter::findSeeds`

```
graph LR; A[Segmenter::findSeeds] --> B[Clip::height]; A --> C[Clip::width];
```

A diagram showing a central node on the left, a gray rectangle labeled `Segmenter::findSeeds`, with two arrows pointing to two nodes on the right. The top node is a white rectangle labeled `Clip::height`, and the bottom node is a white rectangle labeled `Clip::width`. The arrows are dark blue and point from the right side of the central node to the left side of each of the two right nodes.

`Clip::height`

`Clip::width`
