

`std::exception`

```
classDiagram
    class std_exception["std::exception"]
    class NessieException
    NessieException --|> std_exception
```

The diagram shows a class hierarchy. At the top is a box for `std::exception` with two empty slots below the name. Below it is a box for `NessieException` with three slots. A blue arrow points from the top of the `NessieException` box to the bottom of the `std::exception` box, indicating inheritance.

`NessieException`

– `what_`

+ `NessieException()`

+ `~NessieException()`

+ `what()`
