

NessieException.cpp

```
graph TD; A[NessieException.cpp] --> B[NessieException.h]; B --> C[string]; B --> D[exception];
```

The diagram illustrates the relationship between a C++ source file, a header file, and the standard library types it uses. At the top is a grey box labeled 'NessieException.cpp'. A blue arrow points down from this box to a white box labeled 'NessieException.h'. From the 'NessieException.h' box, two blue arrows point down to two separate white boxes: 'string' on the left and 'exception' on the right.

NessieException.h

string

exception
