

Recognizer.h

```
graph BT; main_cpp[main.cpp] --> recognizer_h[Recognizer.h]; recognizer_cpp[Recognizer.cpp] --> recognizer_h;
```

A diagram illustrating file dependencies. At the top is a gray box labeled 'Recognizer.h'. Below it are two white boxes: 'main.cpp' on the left and 'Recognizer.cpp' on the right. Two blue arrows point from the bottom of these boxes up to the bottom of the 'Recognizer.h' box, indicating that both source files include the header file.

main.cpp

Recognizer.cpp
